

ECE 300: Intermediate Design Project  
Spring 2004, Instructor Dragica Vasileska

Homework Assignment #1  
(due Wednesday, February 4<sup>th</sup>, 2004)

Write a rhetorical strategy for a simple writing project – a letter to a prospective employee. Be sure to consider carefully your purpose for writing as well as your audience's needs and biases. The entire strategy should be no longer than one page. An example can be an Electrical engineer looking for a job at Intel Corporation. He/She has to be familiar with semiconductor devices, and programming languages such as C++, Java, etc. Think of the most suitable qualifications this person should have and what are Intel needs.
